

ISI-HBWDSW12V DANLERS

Highbay Surface Mount Passive Infra Red (PIR) Occupancy Detector & Photocell for DALI ballasts

Input: 12VDC

PLEASE READ THESE INSTRUCTIONS BEFORE INSTALLING THE PRODUCT

NOTE: ISI-HBWDSW12V is only compatible to work with ISI enabled equipment.

This ISI-HBWDSW12V Surface Mount Lighting Control can be mounted directly onto solid ceilings or onto a range of different mounting boxes. Configurable for any room occupancy style, via the ISI APP on Google Play or Apple APP Store.

INSTALLATION

To be installed by a competent person with reference to local standards. If in doubt consult a qualified electrician.

- Plan where the ISI-HBWDSW12V is to be located (see diagram 1). Switch off supply and check for hidden cables and pipes.
- The ISI-HBWDSW12V should be connected as shown in diagrams 2 and 3:
 - 12V 12V in.
 - 0V 0V in.
 - SV - Switched control line
- Knockout or drill the appropriate holes on the mounting plate for attaching the plate to the ceiling or back box (if applicable). Feed cables through the appropriate (side or rear) entry hole. Screw the back mounting plate to the ceiling or back box via the mounting holes. Wire the cables into the sensor head block terminal. Push the sensor head onto the mounting plate and align the side clips with the slots on the sensor heads.

OPERATION

To check the operation of the ISI-HBWDSW12V:

- Turn on the supply then after 20 seconds if the sensor has recognised movement of a person within its zone of detection the integral red LED on ISI-HBWDSW12V will stay illuminated for 4 seconds before the red LED turns off.
- Thereafter, every time movement is detected by ISI-HBWDSW12V the integral red LED will stay illuminated for 4 seconds.

The control also features adjustable time out (time lag) control and daylight threshold control which are configured by the INGY APP.

PRECAUTIONS

- Do not place the ISI-HBWDSW12V near heat sources, fans or in ventilated ceiling voids.
- Do not place close to, or positioned such that, any light source points directly into the ISI-HBWDSW12V
- Ensure wires and cables are securely held within the connection terminals.
- The ISI-HBWDSW12V should be protected by a suitable Ampere mcb or fuse.
- Dry-contact outputs are to be supplied by the same SELV/Class 2 output as the input supply to the control.
- Disconnect the INGY-HBWDDA12VIP from the circuit before performing insulation testing of the wiring circuit.**
